			Initial Issue Date	01-01-17
			Revision Date:	Initial Version
			Revision No.	0
GENERAL SAFETY – HEALTH PROVISION			Next Revision Date:	01-01-17
			Preparation: Safety Mgr	Authority: CEO

Purpose

This program is written to be in compliance with local regulatory requirements and provide directives to managers, supervisors, and employees about their responsibilities in the operations and management of RELIANT HOLDINGS AND ITS AFFILIATES facilities as related to the indicated general safety requirements that apply.

This program applies to all employees of RELIANT HOLDINGS AND ITS AFFILIATES, temporary employees and any contractors working for RELIANT HOLDINGS AND ITS AFFILIATES. When work is performed on a non-owned or operated site, the operator’s program shall take precedence, however, this document covers RELIANT HOLDINGS AND ITS AFFILIATES employees and contractors and shall be used on owned premises, or when an operator’s program doesn’t exist or is less stringent.

Key Responsibilities

RELIANT HOLDINGS AND ITS AFFILIATES Safety Manager

- The designated Safety Manager is responsible for developing and maintaining the General Safety Requirements program. These procedures are kept in the designated safety manager’s office.

Site Manager

- Responsible for the implementation and maintenance of the plan for their site and ensuring all assets are made available for compliance with the plan.

Employees

- All shall be familiar with this procedure and the local workplace General Safety Requirements program.
- Follow all requirements, report unsafe conditions, and follow all posted requirements.
- Shall use the safeguards, safety appliances and personal protective equipment while following all safe work practices and procedures for the workplace.

Competency and Training

Workers shall be competent to operate equipment and perform job tasks. A competent worker means adequately qualified, suitably trained and with sufficient experience to safely perform work without supervision or with only a minimal degree of supervision. Work that may endanger a worker must be completed by a worker who is competent to do the work or by a worker who is working under the direct supervision of a worker who is competent to do the work. All workers must be trained in procedures until they are competent. RELIANT HOLDINGS AND ITS AFFILIATES shall permit only qualified by training or experience workers to operate equipment and machinery.

			Preparation: Safety Mgr	Authority: CEO

Training must include: procedures to be taken in the event of a fire or other emergency, the location of first aid facilities, identification of prohibited or restricted areas, precautions to be taken for the protection of the worker from physical, chemical or biological hazards, any procedures, plans, policies and programs that RELIANT HOLDINGS AND ITS AFFILIATES is required to develop and any other matters that are necessary to ensure the health and safety of the worker while the worker is at work.

RELIANT HOLDINGS AND ITS AFFILIATES shall instruct each employee in the recognition and avoidance of unsafe conditions and the regulations applicable to his work environment to control or eliminate any hazards or other exposure to illness or injury.

Inspections

RELIANT HOLDINGS AND ITS AFFILIATES shall ensure that frequent and regular inspections of the workplace, jobsites, materials, equipment and of work processes and procedures by a competent person to identify any risk to the safety or health of any person at the workplace.

RELIANT HOLDINGS AND ITS AFFILIATES shall ensure that every dangerous occurrence is investigated as soon as is reasonably possible.

RELIANT HOLDINGS AND ITS AFFILIATES must ensure that if a risk is identified we will correct any unsafe condition as soon as is reasonably practicable and, in the interim, take immediate steps to protect the safety and health of any person who may be at risk.

General Facility Requirements

Housekeeping

Each work site shall be kept clean and free from materials or equipment that could cause workers to slip or trip. A floor or other surface used by any worker shall be kept free of obstructions, hazards and accumulations of refuse, snow or ice.

RELIANT HOLDINGS AND ITS AFFILIATES requires that a worksite is sanitary and kept as clean as is reasonably practicable.

A reasonable supply of potable drinking water shall be kept readily accessible at a project for the use of workers.

Safe Equipment Maintenance

RELIANT HOLDINGS AND ITS AFFILIATES has a duty to ensure our work site maintenance, systems of work and working environments ensure, as far as is reasonably practicable, the health, safety and welfare at work of the our workers.

We must and shall ensure that all equipment is maintained at intervals that are sufficient to ensure the safe functioning of the equipment. All equipment is to be maintained, safe to perform, adequate strength for its purpose and free from obvious defects. Damaged and faulty equipment reporting procedures must be in place.

Where a defect is found in equipment RELIANT HOLDINGS AND ITS AFFILIATES will ensure that steps are taken immediately to protect the health and safety of any worker who may be at risk until the defect is corrected and the defect is corrected by a competent person as soon as is reasonably practicable.

Any machinery, tool, material, or equipment which is not in compliance with any applicable OSHA requirement is prohibited. The machine, tool, material or equipment shall either be identified as unsafe by tagging or locking the controls to render them inoperable or shall be physically removed from its place of operation.

Any worker who knows or has reason to believe that equipment under the workers control is not in a safe condition shall immediately report the condition of the equipment to RELIANT HOLDINGS AND ITS AFFILIATES and repair the equipment if the worker is authorized and competent to do so.

RELIANT HOLDINGS AND ITS AFFILIATES prohibits and will not require or permit compressed air to be directed towards a worker for the purpose of cleaning clothing or personal protective equipment used by that worker, or for any other purpose if the use of compressed air may cause dispersion into the air of contaminants that may be harmful to workers.

Whenever workers are present at a worksite RELIANT HOLDINGS AND ITS AFFILIATES will provide lighting that is sufficient to protect the health and safety of workers and suitable for the work to be done at the worksite.

No worker is allowed to smoke in an enclosed place of employment, worksite or work-related area except in an area designated for smoking.

Impairment

No person shall enter or remain at any workplace of employment while the person's behaviour or ability to work is affected by alcohol, intoxicating beverages, drugs or other substance so as to create a nuisance or if his or her abilities are impaired so as to endanger any person, or to create an undue risk to workers, endanger the person or anyone else.

Improper Conduct

All workers shall engage in proper activity or behaviour. Improper behaviour that might create or constitute a hazard to any person is not acceptable. Improper activity or behaviour includes horseplay, scuffling, fighting, practical jokes, and unnecessary running or jumping.

Industrial Hygiene

Where a worker is exposed to a potential hazard of injury to the eye due to contact with a biological or chemical substance, an eyewash fountain shall be provided.

A worker who may be exposed to a biological, chemical or physical agent that may endanger the worker’s safety or health shall be trained to use the precautions and procedures to be followed in the handling, use and storage of the agent, in the proper use and care of required personal protective equipment, and in the proper use of emergency measures and procedures.

No food, drink or tobacco shall be taken into, left or consumed in any room, area or place where any substance that is poisonous by ingestion is exposed.

Protective clothing or other safety device that has been worn next to the skin shall be cleaned and disinfected prior to being worn by another worker.

Workers who handle or use corrosive, poisonous or other substances likely to endanger their health shall be provided with washing facilities with clean water, soap and individual towels.

Thermal Stress

A worker must not be exposed to levels that exceed those listed in the screening criteria for heat stress exposure in the heat stress and strain section of the ACGIH Standard. Clothing corrections must be applied in accordance with the heat stress and strain section of the ACGIH Standard.

If a worker is or may be exposed RELIANT HOLDINGS AND ITS AFFILIATES must conduct a heat stress assessment to determine the potential for hazardous exposure of workers, using measures and methods that are acceptable to the local provincial or territorial agency and develop and implement a heat stress exposure control plan.

If a worker is or may be exposed RELIANT HOLDINGS AND ITS AFFILIATES must implement engineering controls to reduce the exposure of workers to levels below those listed in the screening criteria for heat stress exposure in the heat stress and strain section of the ACGIH Standard. If the above action is not practicable, the employer must reduce the exposure of workers to levels below those listed in the screening criteria for heat stress exposure in the heat stress and strain section of the ACGIH Standard by providing; administrative controls, including a work-rest cycle, or personal protective equipment, if the equipment provides protection equally effective as administrative controls.

If a worker is or may be exposed, the employer must provide and maintain an adequate supply of cool potable water close to the work area for the use of a heat exposed worker.

If a worker shows signs or reports symptoms of heat stress or strain, the worker must be removed from the hot environment and treated by an appropriate first aid attendant, if available, or by a physician.

If a worker is or may be exposed to the conditions specified below RELIANT HOLDINGS AND ITS AFFILIATES the employer must conduct a cold stress assessment to determine the potential for hazardous exposure of workers, using measures and methods that are acceptable and develop and implement a cold exposure control plan.

- Thermal conditions that could cause cold stress or injury,
- Thermal conditions that could cause a worker's core body temperature to fall below 36°C (96.8°F), or
- Thermal conditions that are below the levels classified as "little danger" to workers in the criteria for the cooling power of wind on exposed flesh in the cold stress section of the ACGIH Standard.

If a worker is or may be exposed RELIANT HOLDINGS AND ITS AFFILIATES must implement effective engineering controls to reduce the exposure hazard to levels above those classified as "little danger" to workers in the criteria for the cooling power of wind on exposed flesh in the cold stress section of the ACGIH Standard. If the above action is not practicable RELIANT HOLDINGS AND ITS AFFILIATES must reduce the exposure hazard by providing effective administrative controls or personal protective equipment if the equipment provides protection equally effective as administrative controls.

A worker who is or may be exposed must wear adequate insulating clothing and personal protective equipment. If work takes place outdoors in snow or ice covered terrain where excessive ultraviolet light, glare or blowing ice crystals present a risk of injury to the eyes workers must wear eye protection appropriate to the hazards.

If a worker exposed to cold shows signs or reports symptoms of cold stress or injury the worker must be removed from further exposure and treated by an appropriate first aid attendant, if available, or a physician.
